## **DETAILED ACTION**

### ***Restriction Requirement***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 16-20, drawn to a method, classified in class 438 , subclass 200+.

II. Claims 1-15, drawn to a device, classified in class 257, subclass 1+.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method can be used to make a materially different device, such as one which does not require a silicon nitride or silicon oxynitride layer.

3. A phone call was made to Andrew Romero on November 03, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
